Summary

Your clients want their websites to stand out as original and distinct. Each client is unique, but all have one key similarity. They want their websites to be intuitive, stay true to their mission, and resonate with their audience.

I am well versed in code (HTML, CSS, JS), but I'm also more than aware of the importance of dynamic design and striking imagery.

The intersections of these skills can enrich the role of both a programmer and designer, and allow for better collaboration with other team members. Bringing ideas to life through collaboration, is my passion.

When a better way to do something is found, I help to plan it out, and then get things done.

Experience

Freelance Graphic Designer & Web Developer

2013 - Present

Graphic Web Designer & Developer

I have worked as a web developer and designer completing projects for startups, ecommerce and mid-size organizations.

I use a myriad of skills to get projects completed:

Front/Backend Development API development and management. Wordpress Codex and Plugin/Template Modification Creating and Building a Brand Creating Content that Attracts your Target Audience Bringing in Traffic Through Creative Methods Gaining Traction and Brand Awareness Website Development (& UX/UI) Website and Mobile App Design App Development Advice Planning and Strategy Incentive Based Marketing Social Media Outreach Writing/Editing Budgeting for Business Success — My Design Portfolio: http://www.behance.com/IsaiahN

Swank App
Founder   11 / 2014 - 01 / 2016

Swank is an arbitrage app for ecommerce resellers that helps them determine items to stock in their inventory based on average turnover, selling speed and average price.

Ksix Network
Application Programmer   09 / 2013 - 10 / 2014

Brought on the help with the development of a Ksix content gateway, and create new applications to enhance the Ksix publisher experience.
I've worked on several projects with ksix that involved developing incentivized websites and landing pages, helping publishers with coding issues, and creating the Frontend GUI for controlling their Offer Api.

Blvd Media Group
Technical Support & Web Developer   09 / 2012 - 10 / 2014

Brought on as Technical Support for Blvd-Media Group. Job entails using custom coded solutions to aid publishers with mometization platforms and increase communications within customer relations.
I worked on hundreds of websites, integrating the Rewardtool and Accesstool Gateways into existing platforms. When there was no database or system, I often created a database and setup whatever was needed to get these gateways working.
My experience was mostly with Shiftcode, MyvoucherGeek, Aurora PTC, and custom sites. I wrote the documentation and installation guides for the tools, and eventually developed a way to generate iframe codes for users, and to automate a majority of technical support assistance.

Whmsical Web Solutions
Web Development Department Head & Co-Founder   05 / 2011 - 01 / 2013

Serving customers with SEO-Optimized Web-solutions and creating unique applications to produce simple yet effective results.

PC Repair
Computer Repair Technician & Software Support   2007 - 2009

I have repaired many computer systems and provided support for computer operating systems. The technician role included Hardware Upgrades/Repair, Custom Computer Builds, Data Recovery. Software Support included: Virus & Malware Detection/Removal, Network Setup, Computer Optimization, Windows Repair, Mac Repair, Peripheral Setup, and Operating System Upgrades.
